

UPON THE DOCTOR COPELAND'S CURES

As a Right Which Is His and a Duty Which Every Right-Minded Person Owes to Humanity--The Searching Investigation of These Cures as the Only Answer to Careless and Dangerous Criticism.

The greatest wrong that is inflicted on the splendid work of Doctor Copeland and his associates is done by those who, without any right to do so, are making a business of it. They are not only making a business of it, but they are also making a business of it. They are not only making a business of it, but they are also making a business of it.

DEAF SO LONG SHE HAD LOST THE IDEA OF SOUND.

Mrs. W. H. Simmons, 273 Seventh Street, Jersey City: "I had been deaf for seven years, caused by an attack of intermittent fever. I was almost stone deaf in my right ear, and I could hear but little out of my left. I was so deaf when I went to the Copeland Physicians that I had but little idea of sound at all. I would see people laughing and talking, yet I could not catch the faintest sound. "I could only hear conversation by people shouting at the top of their voices to me. After three months' treatment, the noise entirely stopped. I first noticed that I was regaining my hearing by being able to hear what people said on the ferries and elevated trains. "It has been eight months since I stopped my treatment, yet my hearing is as good now as it was then."

SEXTON C. W. CLARK, DEAF TWENTY YEARS.

Charles W. Clark, 903 Myrtle Avenue, Brooklyn, sexton of the East Congregational Church, corner of Kosciusko street and Tompkins Avenue: "I was partially deaf in my left ear for twenty years. My family physician and other physicians treated me without success, prescribing oils and lotions which accomplished nothing. My deafness grew upon me. I could not hear a sermon distinctly, and had difficulty in understanding what people said in conversation. "I went to Doctor Copeland for treatment. It was the beginning of the third month before I noticed any improvement, but when improvement came it came suddenly. All at once my hearing returned to me."

These cases in these columns are printed for no other purpose than to answer this kind of criticism. They are selected from different localities in this region from people who are accessible to you, whom you can go and see. Searching investigation by intelligent, right-minded people is the answer to this dangerous though superficial skepticism, which Doctor Copeland has the right to demand.

DEAF THIRTY YEARS, HEARING PERFECT.

Robert K. Hardenstein, 159 Ralph Avenue, Brooklyn: "For thirty years I was deaf. My left ear was of no use whatever. It was stone deaf. "Ordinary conversation I could not hear at all. To make me understand, people would have to shout in my ear. The ringing noises in my ears were terrible. They sounded like escaping steam and ringing of bells. I went to the Copeland Physicians. My hearing, when it did come back, returned suddenly. I can now hear the clock tick several feet away. "I can close up my right ear and hear distinctly."

STONE DEAF IN ONE EAR.

Mrs. Eliza King, 53 Myrtle Avenue, Brooklyn: "I was stone deaf in my left ear. If I laid on my right side at night I could not hear the elevated trains that thundered past our door. People had to scream at me to make me hear. I had terrible noises in my ears. They kept me awake at night and made me cross and irritable in the day time. Now I can hear ordinary conversation and I can close my right ear and hear distinctly. "The Copeland Physicians have entirely restored my hearing. I can hear as acutely in my left, or as in my dead ear, as I can in my right."

HEARING RESTORED AT 68.

M. J. Hoer, 68 years old, resides at 222 North Second street, Brooklyn, E. D.: "A few years ago I found that I had become

DEAF FORTY-SIX YEARS.

Nicholas Le Comt, 216 York Street (near Gold): "I am now seventy years of age. I first became deaf in the year 1850, forty-six years ago. My hearing was affected very badly again in the year 1858. "For a long time I could not distinguish any sound clearly, and I had noises in the ears. For the past two years my hearing was so bad that I could not understand people talking to me. After a course of treatment by the Copeland Physicians, one day I felt a crackling sound in my ears and something seemed to give way, and lo! and behold, my hearing returned to me like a flash. I was amazed at the wonderful change. I can now hear again positively and distinctly."

HEARING RESTORED AT 65.

Mr. Peter J. Clancy is a painter and decorator, and his place is at 228 East 80th Street. He is 65 years old. He said: "I was exorcised from jury duty by Judge Patterson because I could not hear what the lawyers and the witnesses said. I was so deaf that I could not hear anything that was said to me for several years. It was very annoying, and as an affliction deafness is almost as bad as being blind. Deafness came upon me gradually. After I had been under the Copeland treatment for a time I felt my hearing in my left ear to see if I could hear the clock tick across the room. "I could hear it plainly. I can hear distinctly now everything that is said to me."

DEAFNESS FROM CATARRH.

Miss Grace J. McDonald lives at 112 South Second street, Brooklyn. She is forty years old. She says: "I was deaf for a year, the deafness following a severe cold in the head. The right ear was the most affected. I could not hear the ticking of a watch in my right ear. The treatment was obliged to repeat her operations. Doctor Copeland has completely restored my hearing. I can hear perfectly now."

DEAFNESS FROM SCARLET FEVER.

George Edwin Rees, 17 years old, lives at 1204 Broadway Avenue, Brooklyn. Speaking of his own case, Mr. Rees said: "George had been deaf ten years. He was almost totally deaf. His deafness came from scarlet fever. We had tried a dozen doctors and spent a great deal of money without being able to get any help for him. At last we took him to Doctor Copeland. When his hearing did come back it came back suddenly. One day he clasped his hands to his ears and said to me, 'There is a great deal more noise in the world than I ever suspected.' He hears perfectly."

DEAF FOR TEN YEARS.

Mrs. Elizabeth Jaen, 2108 Fulton Street, Brooklyn, says: "For ten years I was deaf. I was deaf for much of the time almost totally deaf. I went to the Copeland Physicians because I read the testimony of a man whom I knew and whose hearing they had restored. They restored my hearing, too. I can now hear perfectly."

HE WAS TOTALLY DEAF.

Simon Gardner, 1506 Avenue A, City: "I got out of bed one morning and found I was totally deaf in both ears. I couldn't hear a word. I lost all sense of sound. Then I went to the Copeland Physicians, and after a course of treatment I can hear perfectly."

WAS DEAF SIXTY YEARS.

G. L. Germond, 1252 Ponass Street, West Farms, New York City: "For sixty years I was totally deaf in my left ear. Pulsating, whistling noise disturbed me night and day. The Copeland Physicians have made it possible for me to hear. I doubt if any man of my age hears better. The discharges have completely stopped."

NOISES IN THE EARS.

Eugene Baumann, 317 Devoe Street, Brooklyn, says: "I was deaf in both ears and could not hear anything except rumbling sounds as a result of continual noise in my head. I had buzzing noises in my ears that sounded like escaping steam. I can now hear perfectly, and the buzzing noises in my ears are gone."

TWELVE YEARS DEAF AS A POST, NOW HE HEARS PERFECTLY.

William McElwain, 344 Fourth Street, Jersey City: "For twelve years I was entirely deaf in both ears. I was as deaf as a post. There was also a constant discharge from both my ears. "My brother plays the violin. I used to sit close to him to hear him play, but I could not hear a sound. I knew I was getting back my hearing, because I heard him play. One day after I had been for some time under Doctor Copeland's treatment he was playing the violin in the back part of the house. "I was sitting in the front room in an opposite

William McElwain, 344 Fourth Street, Jersey City. Totally deaf 12 years. Hearing now perfect.

part of the house. I was not only able to hear the sound of the violin, but I could distinguish one tune from another. It was the first time in twelve years that I could hear anything. "Mrs. McElwain, his mother, corroborated William's story in every particular and added: 'Nothing was done for him until he did his good until I took him to the Copeland Physicians. He took a course of treatment, with the result that he could hear as good as anybody. The discharge from his ears has stopped and he is a changed boy in every way.'"

FATHER KEOUGH, OF ST. ALOYSIUS'S RECTORY.

Rev. James Keough, of St. Aloysius's Rectory, No. 66 Bowersy street, Newark, N. J., sends the following testimony as to his own experience with the Copeland treatment. Father Keough writes under date of October 25: "For a number of years I had suffered from throat trouble, which interfered very much with the performance of my duties. I began the Copeland system of treatment and after a short course I met with very beneficial results. "REV. J. KEOUGH."

HEARING RESTORED AT 68.

Jacob Gemming, 58 years old, No. 528 East 10th Street: "I was deaf in my left ear for over twenty years. Two years ago my right ear became affected also. I tried several ear specialists, but their efforts had no effect. I could not hear ordinary conversation. I could not hear the clock tick. I began the Copeland system of treatment and after a short course I met with very beneficial results. "REV. J. KEOUGH."

THE CURE OF CATARRH.

Edward Healey, Jr., 15 years old, of 255 Adams Street, Brooklyn, is a bright young man employed in the Brooklyn office of the New York Herald. "For two years he suffered greatly from catarrh, resulting from a severe cold. His father says: 'It made me feel bad to see my son suffer so. He lost his appetite, was constantly
